

# Additional Claritas Calculated Dataset

Claritas rolls up the 63 different race combinations into smaller subsets, to include 6 "race alone" and 6 "alone or in combination" race categories (White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and Other). The "in combination" categories represent the population that checked any one race category either alone or in combination with another race category. For example, anyone who checked White would be shown in the "White alone or in combination" counts. The counts are then cross-tabulated with "Hispanic or Latino" and without "Hispanic or Latino" origin.
